

Leclanché North America Opens New Research and Manufacturing Facility in Purdue University's "Polytechnic Flagship Center" in Anderson, Indiana

Global Energy Storage Leader Advances Lithium Ion Battery Technology for Utility Grid and Electric Vehicle Charging Applications in North America

ANDERSON, Ind., DALLAS and YVERDON LES BAINS, Switzerland, Aug. 25, 2017 /PRNewswire/ -- Leclanché SA (SIX: LECN), one of the world's leading energy storage solution companies, announced today the opening of its North American subsidiary's new research and manufacturing facility located within Purdue University's "Polytechnic Center" in Anderson, Indiana.

The Purdue Polytechnic and Flagship Enterprise Center is an all-encompassing educational complex, from academic and lab spaces to mini-manufacturing operations, which creates hands-on interaction and engagement with high-tech Indiana companies – all under one roof – providing collaboration and exposure to entrepreneurship and innovation.

Globally, Leclanché produces a wide range of energy storage solutions for homes, small offices, industry, electricity grids, as well as solutions for transport such as electric buses and cars, and marine applications. Leclanché North America, headquartered in Dallas, was formed in 2016 to capitalize on fast-growing, renewable energy market opportunities in the United States and Canada. The company currently has three major projects underway in North America including energy storage systems for grid ancillary services in the midwest U.S. and Ontario, Canada, and a recently announced network of electric vehicle fast-charging stations along a portion of the Trans-Canada Highway.

Leclanché North America's new 10,000 square foot facility houses office, research and development, testing and manufacturing floor space along with a customer demonstration area. The company's Dallas headquarters hosts management, sales and marketing personnel.

"We are extremely pleased to be part of this dynamic Enterprise Center at Purdue Polytechnic which brings together the university's incredible resources and engineering traditions," said Thom Reddington, senior vice president, Leclanché North America. "While this facility once saw tremendous advances in automobile engineering, it now becomes the home of future renewable energy storage solutions that will power our homes, businesses and cars in a carbon-free environment. We are honored to be part of this exciting enterprise."

About Leclanché

Leclanché is one of the world's leading, vertically integrated, energy storage solution providers. It delivers a wide range of energy storage solutions for homes, small offices, industry, electricity grids, as well as solutions for transport such as electric buses and marine applications. Established in 1909, Leclanché has been a trusted provider of battery energy storage solutions for over 100 years.

Leclanché is listed on the Swiss stock exchange, and is the only listed, pure-play, energy storage company in the world.
