

Legrand Announces Integration of On-Q Digital Audio System Into Alarm.com Platform

The First Built-In Enclosure-Based Audio Product in the Alarm.com Ecosystem Provides a Seamless Audio Solution for Smart Home Service Providers

MIDDLETOWN, Pa., July 9, 2018 – Legrand, the global specialist in electrical and digital building infrastructures, announced that its On-Q Digital Audio System has been integrated with Alarm.com, the leading platform for intelligently connected properties. Alarm.com service providers now have the opportunity to create new revenue streams with an affordable multi-source, multi-zone audio system.

Alarm.com's smart home solutions enable property owners to secure, monitor and control their homes from anywhere. With Alarm.com's family of mobile apps, users can seamlessly connect to a broad ecosystem of best-in-class connected devices – which now includes the On-Q Digital Audio System from Legrand.

The On-Q Digital Audio System delivers exceptional listening experiences with convenient in-wall amplified keypads and high-quality sound, based on an easily installed structured wiring design. The system is scalable and repeatable, enabling users to enjoy music in up to 16 zones throughout the home from mobile devices, networked computers and streaming services including Pandora, iHeartRadio, Napster, SiriusXM, TuneIn, Spotify and more.

Through this new integration, individuals will be able to create the perfect ambiance for their smart home through the creation of pre-programmed “scenes” that allow the automatic control of music and audio content from a single app. For instance, they will be able to wake up with their favorite music or radio station, or easily turn off all the connected speakers in their home at the end of the day.

“As the first built-in enclosure-based audio product in the Alarm.com ecosystem, the integration of the On-Q Digital Audio System with Alarm.com offers an engaging and intelligent solution that enables security system service providers to meet the growing consumer demand for entertainment options in outfitting the smart home,” said Fritz Werder, Legrand VP and general manager, On-Q and Nuvo lines. “In addition to the RMR income they receive for security services, resellers can use the digital audio system to increase product sales and expand relationships with customers.”
