

OEC Launches Enhanced iBroker Mobile Trading Platform

Smartphone App Developed by TradingMotion Supports Active Futures, Options and Forex Trading on the Go

CHICAGO and MADRID, Nov. 15, 2012 /PRNewswire/ -- [OEC](#), the online futures division of [GAIN Capital Holdings, Inc.](#) (NYSE: GCAP), and TradingMotion, today introduced the new iBroker mobile application with enhanced mobile trading capabilities. The application, developed by TradingMotion, combines a powerful mobile trading platform and impressive digital display with the easy-to-use functionality of popular mobile devices including the iPad, iPhone, and Android devices.

OEC's iBroker provides traders with the ability to access real-time market data on futures markets around the globe, as well as forex currency pairs.

"OEC is excited to offer this new mobile technology to our clients," said Rick Tomsic, president of OEC. "The OEC iBroker app enables traders to easily and efficiently execute trades and manage their account, while seamlessly syncing with desktop trading activity."

"We are proud to be partnering with OEC and sharing our iBroker app with OEC's loyal customer base," said Jon Berrojalbiz, founder of TradingMotion. "Our talented development team has achieved its goal of creating an app that translates many of the features futures traders like on their PCs to their handheld devices, while improving them in the process."
