

Secure-24 Named to Managed Service Provider 500 List by CRN

Company Recognized for Exemplary Approach to Delivery of Managed IT Services

SOUTHFIELD, Mich., Feb. 17, 2015 /PRNewswire/ -- Southfield, Michigan-based Secure-24 has been named to The Channel Company's 2015 CRN Managed Service Provider (MSP) 500 list of top technology providers and consultants in North America.

Secure-24 is a leading provider of managed IT operations, application hosting and cloud services. The company was selected as one of the MSP Elite 150. The annual list honors organizations whose leading approach to managed services enables their customers to improve operational efficiencies, elicit greater value from their IT investments, and successfully leverage technology to achieve greater competitive advantage.

This year, CRN's industry-focused directory highlights the Top 500 MSPs in three categories: 100 Hosting Providers who are experienced in providing mainly off-premise, or cloud-based, services; 150 Elite Service Providers who are large data center-focused solution providers with a strong mix of on-premise professional services as well as off-premise services; and 250 Progressive Service Providers who have a business model heavily weighted toward managed services geared toward the small and midsize business market.

Secure-24 turns IT challenges into business opportunities with a full range of solutions including infrastructure support, application management and cloud services for highly compliant and mission critical systems. The company also offers Service Management, Security, and Microsoft Exchange solutions, enabling Secure-24 to drive cost efficiencies, accelerate service delivery and optimization across the lifecycle of their customers' systems.

"The allure of Everything-as-a-Service to organizations is largely rooted in the appeal of predictable operational expenses, cost cutting, resource allocation and access to on-demand/pay-as-you-go technology. Therein lies a great need for the expertise of managed service providers," said Robert Faletra, CEO, The Channel Company. "We congratulate the managed service providers who have engineered, or re-engineered, their businesses to deliver the services their customers rely on for future growth and ongoing success."

"Our service offerings deliver flexible and scalable managed cloud solutions that enable our clients to focus on their core businesses and gain a more competitive advantage within their industries," said Mike Jennings, CEO, Secure-24. "We are honored to be named an elite service provider by CRN; this recognition is a testament to our employees who provide the highest quality service and support."

Coverage of the MSP500 will be featured in the February 2015 issue of CRN and online at www.CRN.com,
