

Park Place Technologies Achieves Additional “Powered by Nutanix: Verified Solutions” Badge

Achieving this official verification from Nutanix helps Park Place Technologies’ customers more easily identify that its sovereign cloud services have been evaluated against Nutanix program criteria

CLEVELAND, Ohio and LONDON, UK, August 12, 2026 —Park Place Technologies today announced it has achieved its fourth “[Powered by Nutanix: Verified Solutions](#)” badge. The badge reflects the company’s commitment to designing and delivering services aligned with Nutanix prescribed best practices and architectural standards.

Through the “Powered by Nutanix: Verified Solutions” program, Park Place Technologies’ Sovereign Cloud offering has been reviewed against Nutanix-defined technical and operational criteria for alignment with platform best practices. As data sovereignty moves up the boardroom agenda, this offering responds to a clear market need: cloud models that give organizations the freedom to innovate while maintaining greater control over data location, governance, and operational risk.

It follows the successful achievement of our previous “Powered by Nutanix: Verified Solutions” badges for Dedicated Private Cloud, Multi-Tenant Private Cloud, and Disaster Recovery as a Service solutions, reflecting a sustained, scalable commitment to delivering secure, resilient, and enterprise-grade cloud and IaaS services to customers.

These recognitions are designed to provide customers with confidence that their cloud services are built on Nutanix technology and aligned with defined design and operational guidelines.

The “Powered by Nutanix: Verified Solutions” program empowers service providers to deliver comprehensive, market-ready cloud offerings built on the Nutanix Cloud Platform. These solutions provide a modern architecture that is designed to support performance, security, and scalability requirements and the flexibility to support virtual machines, containers, and AI workloads, all managed via a single, unified control plane.

With four “Powered by Nutanix: Verified Solutions” badges, Park Place Technologies has achieved a key milestone that underscores its commitment to delivering validated, enterprise-grade cloud solutions.

“We’re pleased that Park Place Technologies Sovereign Cloud offering has achieved the “Powered by Nutanix: Verified Solutions” badge,” said Sachin Chheda, Vice President, Business Development and Strategic Partnership at Nutanix. “By combining Nutanix’s proven software platform with Park Place Technologies’ innovation, we’re proud to enable a new generation of cloud services that are differentiated and unlock new value for customers, with the assurance that these solutions have been evaluated in accordance with Nutanix program criteria.”

The announcement comes at a time when many organizations are reassessing their virtualization and cloud strategies. As enterprises evaluate options for hybrid cloud, sovereign cloud requirements, and alternative virtualization platforms, Park Place Technologies provides customers with a range of deployment models supported by independently verified solutions. This enables businesses to align infrastructure decisions with operational, regulatory, and commercial objectives while reducing transformation risk.

“Organizations are increasingly looking for proven partners that can help them simplify infrastructure, reduce complexity, and maintain control over where and how their workloads run,” said Kevin Kenning, General Manager, Cloud Solutions for Park Place Technologies. “Achieving four “Powered by Nutanix: Verified Solutions” badges demonstrates the maturity of our cloud portfolio and our continued investment in delivering trusted platforms that help customers scale and modernize with confidence.”

The Park Place xCloud platform, powered by Nutanix technology, offers customers flexible deployment options spanning dedicated private cloud, multi-tenant cloud, Disaster Recovery as a Service, and sovereign cloud. This approach allows organizations to place workloads where they make the most sense from a performance, security, compliance, and cost perspective.

The latest validation further strengthens the longstanding relationship between Park Place Technologies and Nutanix and highlights the organizations’ shared commitment to helping customers modernize infrastructure while maintaining operational resilience and business agility.

The “Powered by Nutanix: Verified Solutions” badge reflects evaluation against Nutanix program criteria and does not constitute a warranty, endorsement, or guarantee of performance, security, or regulatory compliance by Nutanix.

About Park Place Technologies

Park Place Technologies is a leading global IT infrastructure services firm with \$1.2 billion in annual revenue and 3,300 employees.

We help 25,000+ organizations in 180 countries – including half the Fortune 500 – fuel innovation by dramatically reducing time and money spent on IT infrastructure management, while boosting performance and uptime. Powered by the world's largest on-the-ground engineering team, a robust group of advanced engineers, and our global Enterprise Operations Centers, Park Place delivers significant cost savings on hardware maintenance, software technical support, hardware procurement, and more. We also streamline IT infrastructure management, freeing internal teams from day-to-day tasks, enabling them to focus on strategic initiatives.
