

Park Place Technologies to Exhibit AI Infrastructure Expertise at the Gartner® IT Symposium/Xpo™ 2026

Attendees can explore liquid cooling technology, GPU infrastructure support and strategies for funding AI initiatives without increasing IT spend

CLEVELAND — Oct. 19, 2026 — Park Place Technologies will showcase solutions designed to help organizations scale AI infrastructure more efficiently at Gartner IT Symposium / Xpo 2026, October 19-22 in Orlando.

Visitors to booth #449 will experience a live liquid cooling demonstration and connect with experts on GPU-powered infrastructure, data center optimization and strategies for supporting AI growth without increasing IT spend. Park Place Technologies is a leading global IT infrastructure services firm.

"Organizations are under pressure to scale AI quickly while managing infrastructure complexity and controlling costs," said John Stock, Chief Commercial Officer at Park Place Technologies. "At Gartner IT Symposium/Xpo, we're looking forward to showing how Park Place helps customers optimize their existing environments, support emerging GPU infrastructure and remove barriers to drive new AI initiatives forward."

On Tuesday, Oct. 20, 12:05 p.m. EDT at Stage 2 Atlantic Hall, Stock will lead a special vendor presentation entitled, "How CIOs are Funding AI Without New Spend." He will address the challenges many organizations face in optimizing AI utilization while facing budget constraints alongside growing infrastructure demands. Stock will share practical strategies for identifying and redirecting existing infrastructure savings to support AI initiatives.

Attendees visiting Park Place Technologies can:

- Experience a live demonstration of liquid cooling technology designed for high-density AI workloads.
- Meet with company leadership, including CCO John Stock and CTO Chris Carreiro, to discuss infrastructure modernization and AI readiness strategies.
- Explore how Park Place helps organizations maximize uptime, performance, and lifecycle value across GPU-powered AI, analytics, and HPC environments.

Gartner IT Symposium / Xpo is one of the largest annual gatherings of CIOs and IT executives, drawing thousands of senior technology leaders. This year's program, themed Ignite Intelligence, focuses on how enterprises move AI from experimentation to production at scale.

To register with Park Place's exhibitor discount, visit [Gartner IT Symposium/Xpo™ 2026 Conference in Orlando, FL](#) and use Park Place's code SYM36EDC to save \$575.

Additional 2026 Appearances

Following Orlando, Park Place Technologies will exhibit its AI infrastructure expertise to Gartner Symposium / Xpo events in Barcelona, Spain (Nov. 9-12) and Yokohama, Japan (Nov. 4-6). Attendees can meet with Park Place experts to discuss data center modernization, infrastructure lifecycle management, AI readiness, and support strategies tailored to today's evolving IT landscape.

About the Gartner IT Symposium/Xpo 2026

Gartner IT Symposium/Xpo is the world's most important gathering for CIOs and other IT executives. IT executives rely on these conferences to learn how to amplify the impact of the technology, insights and trends shaping the future of IT and business. Follow news and updates from the conferences on X using #GartnerSYM, and on the Gartner Newsroom.

About Park Place Technologies

Park Place Technologies is a leading global IT infrastructure services firm with \$1.2 billion in annual revenue and 3,000+ employees. We help 25,000+ organizations in 180 countries – including half the Fortune 500 – fuel innovation and accelerate AI transformation by dramatically reducing time and money spent on IT infrastructure management, while boosting performance and uptime.

Powered by the world's largest on-the-ground engineering team, a robust group of advanced engineers, and our global Enterprise Operations Centers, Park Place delivers significant cost savings on [hardware maintenance](#), [software technical support](#), [hardware procurement](#), and more. We also streamline [IT infrastructure management](#), freeing internal teams from day-to-day tasks, enabling them to focus on strategic initiatives — including AI acceleration.
