ZeeVee Introduces SDVoE Decoder and Shows Award-Winning AV over IP Encoder at InfoComm 2024

Company to Conduct AVIXA AV Network Prep Training Today

LITTLETON, Mass., and LAS VEGAS, June 12, 2024 – At InfoComm 2024, ZeeVee (booth C8648) unveils a new SDVoE 10Gb decoder and features the first North American showing of its award-winning AV over IP 1Gb encoder recently unveiled at ISE.

In addition, ZeeVee is conducting an AVIXA training session today entitled 'AV Network Prep, Readiness and Design.' The company's show presence is all designed to illustrate its tagline, 'ZeeVee Makes AV over IP Easy.'

Introducing the Updated ZyPer4K-XS SDVoE Decoder

ZeeVee's updated ZyPer4K-XS SDVoE decoder with Dante and full USB 2.0 functionality makes its debut at InfoComm. The model offers cost-effective solutions for the distribution and switching of uncompressed 720p, 1080p HD, Ultra HD and 4K resolution content, audio and control via off-the-shelf 10Gb Ethernet switches. A lightweight and durable chassis, as well as quiet fanless thermal management, enables it to be placed virtually anywhere. More details on the ZyPer4K-XS are available here.

The ZyPerUHD60-2EMP: A Best of Show Winner at ISE 2024

The ZyPerUHD60-2EMP is the industry's first encoder that integrates a comprehensive control and security interface. By integrating the company's popular ZyPer Management Platform (ZMP 3.x), the ZyPerUHD60-2EMP is capable of operating an AVoIP system with enhanced network, account and GUI application safeguards – all without the need for additional components.

Like the other ZMP format offerings, this combo unit will enable the easy building of video walls (up to 15 x 15) and the auto-discovery of all connected appliances so that they are instantly viewable. In addition, the unit reduces required rack space and AV system cost. It delivers pixel-for-pixel reproduction of compressed 1080p HD and full 4K@60 4:4:4 UHD resolution content over 1Gb networks.

"Our newest AV over IP encoder simplifies and reduces the cost of AV system deployments by integrating advanced management and security capabilities into one component," said Bob Michaels, CEO, ZeeVee. "We look forward to showing how we make AV over IP easy with dynamic demonstrations of our products integrated in systems with an array of the latest LED wall and monitor technology from SHARP, interconnected NetGear switches and monitors from AVOCOR."

"Overall, ZeeVee's products represent the pro AV market's most extensive offering of IP-based video distribution solutions for projects of all sizes and complexity."

AV Network Prep, Readiness and Design Training Session

(Wednesday, June 12, 4:00 – 5:00pm; room W228)

ZeeVee's Director of Product Management Art Weeks will lead an AVIXA training session entitled 'AV Network Prep, Readiness and Design,' where attendees will learn the intricacies of AVoIP-based network design. It will start with an introduction to what an IP network switch is and focus on important concepts specific to designing and installing a functional AVoIP network. Attendees will leave the session with a better understanding of switch backplanes, LANs, VLANs, full/half duplex communication, AV directional flow, PoE and PoE budgeting.

Many real-world AV over IP network examples will be reviewed and discussed to highlight the advantages of various system

design approaches. The course will wrap up by providing a high-level checklist of things to watchout and plan for with any AVoIP network design followed by a Q & A period.

To schedule an appointment with the ZeeVee team at InfoComm, you can use the company's online scheduler at this link.

About ZeeVee

ZeeVee is a leading provider of AV signal distribution technology. The company has revolutionized the pro AV and IT industries with its award-winning encoders, decoders and software. Integrators and AV consultants rely on ZeeVee for its reliability, value and easy-to-install AV over IP, RF modulation and IP streaming platforms for enterprise, academic, government, healthcare, casino, museum, hospitality and retail customers. The company is a founding member of the SDVoE Alliance and a PSNI Global Alliance Vendor Partner. It holds a GSA schedule and its products are TAA-compliant. ZeeVee is headquartered in greater Boston with its European head office in Augsburg, Germany, and Southeast Asian offices in Singapore.
