ZeeVee's Latest AVoIP Encoders and Decoders and Updated ZyPer Management Platform to be Featured at InfoComm India

BANGKOK, August 14, 2024 – ZeeVee's latest AV over IP encoders and decoders, as well as its newly updated ZyPer Management Platform, will be featured at InfoComm India 2024 (September 3 – 5, 2024, booth G-36).

ZeeVee India Country Manager Rajesh Patkar and Southeast Asia Regional Manager Ricky Tan will be on hand to demonstrate the company's recently enhanced ZyPer4K-XS SDVoE 10Gb decoder with Dante AES67 audio and full USB 2.0 support. They'll also be displaying the award-winning ZyPerUHD60-2EMP AVoIP 1Gb encoder, the industry's first with a comprehensive built-in operating and security system.

ZeeVee's newly updated ZyPer Management Platform (ZMP 4.0) with "VAM," a visualization, analysis and monitoring tool that streamlines the operation of an AVoIP-based system, will make its debut at the show.

"We have once again raised the bar in terms of making AVoIP even easier with high performance, intuitive system operation and robust security features for medical, enterprise, higher education and retail sectors and beyond," said Patkar. "InfoComm India is an important platform for us to show integrators and end-users in this fast-growing pro AV marketplace our latest AVoIP encoders and decoders and technologies that are the backbone of successful project deployments of all sizes and environments."

AV over IP Made Easy for All Applications

Also to be exhibited are ZeeVee's full line of ZyPer4K 10Gb SDVoE and ZyPerUHD60 1Gb AVoIP offerings, which represent the industry's largest line of encoders and decoders for IP-based signal distribution. This includes the ZyPer4K models for medical applications and the ZyPerUHD60-2E encoder and ZyPerUHD60-2D decoder that are ideal for meeting spaces.

The company's updated **ZyPer4K-XS SDVoE decoder** with Dante and full USB 2.0 functionality offers a robust and cost-effective solution for the distribution and switching of uncompressed 720p, 1080p HD, Ultra HD and 4K resolution content, audio and control via off-the-shelf 10Gb Ethernet switches. A lightweight and durable chassis, as well as quiet fanless thermal management, enables it to be placed virtually anywhere.

The **ZyPerUHD60-2EMP**, which delivers pixel-for-pixel reproduction of compressed 1080p HD and full 4K@60 4:4:4 UHD resolution content over 1Gb networks, is the industry's first encoder that incorporates a comprehensive control and security interface. By integrating the company's popular ZyPer Management Platform 4.0, the ZyPerUHD60-2EMP is capable of operating an AVoIP system with enhanced network, account and GUI application safeguards – all without the need for additional components.

The **ZyPer Management Platform 4.0** features an innovative tool called "**VAM**" that enables the visualization, analysis and monitoring of an entire AVoIP-based system. It auto-discovers all components with graphical representation and allows users to analyze what they are working on in real-time. It also provides instant access to switch-related data and the ability to observe individual switch ports/links data via multiple live chart options. ZMP 4.0 also offers 802.1X security support for ZyPer4K-XS and ZyPer4K-XR AVoIP encoders and decoders, which allows the network to identify a connected device and decide whether to allow access. VAM provides efficient support and eliminates downtime for integrators and their end-users – resulting in cost-savings.

To schedule an appointment with the ZeeVee team at InfoComm India, please contact Rajesh Patkar at rpatkar@zeevee.com or Ricky Tan at rtan@zeevee.com.

About ZeeVee

ZeeVee is a leading provider of AV signal distribution technology. The company has revolutionized the pro AV and IT industries with its award-winning encoders, decoders and software. Integrators and AV consultants rely on ZeeVee for its reliability, value and easy-to-install AV over IP, RF modulation and IP streaming platforms for enterprise, academic, government, healthcare, casino, museum, hospitality and retail customers. The company is a founding member of the SDVoE Alliance and a PSNI Global Alliance Vendor Partner. It holds a GSA schedule and its products are TAA-compliant. ZeeVee is headquartered in greater Boston with its European head office in Augsburg, Germany, and Southeast Asian offices in Singapore.

Kramer, the global audio visual experience company based in Tel Aviv, Israel, acquired ZeeVee in August 2024 to strengthen its leadership in the AVoIP and IT/AV convergence arenas.
