

ZeeVee Begins Dual-Track Series of Webinars on AVoIP, RF Modulation and Video Streaming for Integrators, Consultants and End-Users

‘SIGNAL Sessions’ and ‘Certified Solution Partner Training’ Events Provide the Information and Best Practices Needed to Make Best AV Distribution System Choices

LITTLETON, Mass., June 1, 2020 — [ZeeVee, Inc.](#) has launched a dual-track series of webinars—called SIGNAL Sessions and Certified Solution Partner Training—that provides integrators, consultants, distributors and end-users with best practices for signal distribution technologies, product information and case studies of successful AV projects.

The SIGNAL Sessions series launched with a program on corporate AV and featured projects for Commvault, with the company’s Audio Video Specialist Dave Surdukowski, and Vice Media. Its next installment will take place on June 18 with a focus on AV in higher education.

The first Certified Solution Partner Training included two courses—an AVoIP course that provided participants with 2.5 AVIXA CTS credits, followed by one on RF modulation that awarded 1.0 CTS credit. Both will be available to ZeeVee SIGNAL Partners for viewing on demand; the next training webinar will take place June 25.

Topics, dates and times, as well as registration details, for additional upcoming events can be found at this [link](#).

“These webinars are designed to engage the AV industry in mutually beneficial interactions that will build all of our businesses through the sharing of information and resources. They also give end-users across an array of vertical markets a view of what is possible with AV distribution technology,” said Joe Chordas, VP, marketing and North America sales. “We are committed to presenting engaging programs that will enrich our SIGNAL Partners with relevant training and valuable AVIXA CTS credits.”

Two Webinar Formats Offer Something for Everyone

SIGNAL Sessions, which are open to all—including end-users, consultants and resellers—run 45 minutes and feature insights for those working in all aspects of the industry including select vertical markets. In June’s higher education-themed event, Rob Muddiman, ZeeVee’s EMEA sales director; Charlie Sullivan, head of business development, UK and Ireland; and George Vlismas, EMEA technical manager will present an overview of winning AV systems created for universities in the U.K.

The Certified Solution Partner Training webinars, designed to support the channel, will be open to current and potential SIGNAL Partners. The event will cover AVoIP and RF modulation, provide a Netgear smart switch primer and offer all participants up to 3.5 AVIXA CTS credits for participants.

About ZeeVee

ZeeVee (www.zeevee.com) is a global pioneer and leader in the development and deployment of AV distribution systems for industrial, commercial and residential applications. As the only manufacturer that can deliver multimedia content over fiber, CATx and coax, ZeeVee has transformed the digital video industry with its award-winning HD to Ultra-HD/4K solutions for the pro AV and IT marketplace. The company offers a variety of innovative, cost-effective and easy to install AVoIP and RF distribution platforms. ZeeVee’s technologies and products are installed in thousands of facilities worldwide where there is a need to transport HD/UHD content from multiple sources to multiple displays over long distances. ZeeVee is a founding member of the SDVoE Alliance and a Global Presence Alliance Technology Partner.
